Outlining Text

GUIDE TO OUTLINING TEXT NO NEED TO SEND FONTS! IT IS SO EASY!

Here at BeeNoticed it's our job to produce awesome branded products that create just the right kind of buzz for your brand.

Outlining TEXT

Why do we need to outline the text?

Everyone has different fonts installed on their computer, so if you send artwork to someone else, they may not have the font and Illustrator will prompt us that the font is missing and will replace it with another font.

When sending artwork to print, the fonts used must be embedded into PDF's or outlined for .ai and EPS documents to enable us to work with them.

If you're in any doubt about how to outline the text, you can send us the font and we will sort it out for you! Contact our team and we'll help you out - just give us a call on **01623 415944** or email **print@beenoticed.co.uk**

Helping your brand go places...

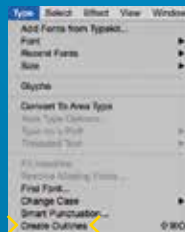

Outlining TEXT

How do we outline the text?

- Open the file in Illustrator
- Select all the elements within the document (you can do this by pressing Ctrl / Cmd + A)
- Go to Type and select 'Create Outlines'

There is a video tutorial on our YouTube page - [Click here to view the video](#)
