General guidelines

- Total Graphic Area:
  4038 (w) x 2225 (h) mm

- Please note where panel breaks are located and try to minmise the amount of type that crosses over the panel breaks.

- This is supplied at 25% of finished size.

- This includes 3mm bleed (shown by red line).

- Use vectorised format for best quality print (editable .pdf, .ai or .eps). .jpg and .png formats are not recommended.

- Please do not place linked files, as we will not be able to see them when received. Make sure everything are directly placed onto the document.

- For photographs, use .TIFF format.

- Please remove all unnecessary clipping paths.

Check for Non-Native layers and remove / replace them, as they cause weird graphical artefacts when printed.

Do not forget to outline any text before sending artwork.

The quickest way to do this is by selecting everything (Ctrl / Cmd + A) and go to Type > Create Outlines.
